

SUNSMART POLICY

Help for non-English speakers

If you need help to understand the information in this policy please contact the school office on 9890 1560 or via email at surrey.hills.ps@education.vic.gov.au

PURPOSE

The purpose of this policy is to encourage behaviours at Surrey Hills Primary School to minimise the risk of skin and eye damage and skin cancer.

This policy provides guidelines to:

- support staff and students to use a combination of sun protection measures when UV index levels are 3 or above (generally mid-August – end of April)
- ensure that there are outdoor environments that provide adequate shade for students and staff
- ensure students are encouraged and supported to develop independent sun protection skills to help them to be responsible for their own protection
- support our school's strategies to meet its duty of care and occupational health and safety obligations to minimise harmful UV exposure and associated harm for students and staff.

SCOPE

This policy applies to all school activities, including camps and excursions. It is applicable to all students and staff.

POLICY

Excessive exposure to the sun's ultraviolet (UV) radiation can cause health problems including sunburn, damage to skin and eyes, and an increased risk of skin cancer.

UV radiation:

- cannot be seen or felt
- can be reflected off surfaces such as buildings, asphalt, concrete, water, sand and snow
- can pass through light clouds
- varies in intensity across the year (highest in Victoria from mid-August – end of April)
- peaks during school hours.

Sun safety is a shared responsibility and staff, parents and students are encouraged to implement a combination of sun protection measures whenever UV levels reach 3 and above (typically from mid-August to the end of April in Victoria). Information about the daily local sun protection times is available via the free SunSmart app (available to download from the App Store and Google Play), or at sunsmart.com.au or bom.gov.au.

Surrey Hills Primary School has the following measures in place to help reduce the risk of excessive UV sun exposure for staff and students.

Shade

Surrey Hills Primary School will provide sufficient options for shelter and trees to provide shade on school grounds, particularly in places such as:

- where students congregate for lunch
- outdoor lesson areas
- popular play areas.

When building works or grounds maintenance is conducted at Surrey Hills Primary School that may impact on the level of shading available to staff and students, a review of the shaded areas available will be conducted and further shading installed as appropriate.

Sun protective uniform/clothing

Surrey Hills Primary School's school uniform and dress code includes sun-protective clothing, including:

- loose, cool, closely woven fabric
- shirts with a collar
- tops with long sleeves
- longer style shorts and skirts.

From mid-August to 30 April, all students **must** wear a sun protective hat that shades the face, neck and ears for all outdoor activities. Hats may also be worn for all outdoor activities outside of the August to April time period, by parent or student choice.

Students are required to wear a school hat or another hat style that protects the face, neck and ears when outdoors. Students who are not wearing appropriate protective clothing or a hat may be asked to play in the shade or in a suitable area protected from the sun.

Sunscreen

Surrey Hills Primary School encourages all staff and students to apply SPF30 (or higher) broad-spectrum, water-resistant sunscreen daily whenever UV levels reach 3 and above. Sunscreen should be applied at least 20 minutes before going outdoors, and reapplied every two hours according to [manufacturer's instructions](#).

Surrey Hills Primary School has strategies in place to remind students to apply sunscreen before going outdoors i.e. reminder notices, reminders by the teachers, sunscreen monitors, sunscreen buddies.

Surrey Hills Primary School students are welcome to attend the general office to access sunscreen. Staff and students who may suffer from allergic reactions from certain types of sunscreen are encouraged to contact the general office to implement a management plan to reduce the risk of an allergic reaction at school. Parents are welcome to provide their own sunscreen to students.

Staff and families should role model SunSmart behaviour and are encouraged to apply SPF 30 (or higher) broad-spectrum, water-resistant sunscreen when outside.

Curriculum

- Students at our school are encouraged to make healthy choices and are supported to understand the benefits and risks of sun exposure. Surrey Hills Primary School will address sun and UV safety education with students involved in a variety of learning activities to develop knowledge, attitudes and skills relevant to personal skin protection.

Staff are encouraged to access resources, tools, and professional learning to enhance their knowledge and capacity to promote sun smart behaviour across the school community.

COMMUNICATION

This policy will be communicated to our school community in the following ways:

- Available publicly on our school's website
- Included in staff induction processes
- Included in staff handbook/manual
- Reminders in our school newsletter
- Discussed in student forums
- Hard copy available from school administration upon request
